Reconsideration Decision Flow in QMS

Station A (Employee's Station): Employee Notified of Error → Request for Recon? → No → Employee Accepts/Corrects Error; Employee Notified by email of Recon 1 Decision → Request for Recon 2? → No → Employee Accepts/Corrects Upheld or Mitigated Errors; Employee Notified by email of Final Recon 2 Decision → Employee Accepts/Corrects Upheld or Mitigated Errors

Original Reviewer: QRS 1 Cites Error — Yes

Updated Recon Process

1st Level Recon: QRS 2 agrees with original error?

2nd Level Recon: QRS 3 agrees with original error?

QMS Outcome: Error Removed from QMS (No) / Error Upheld or Mitigated (Yes); Error Removed from QMS (No) / Error Upheld or Mitigated (Yes)
