THE LATEST NEWS, HIGHLIGHTS, AND ANNOUNCEMENTS

BREAKING NEWS

System Migration Overview

LTS is now DGI.

BDN expected to migrate into these two systems:

- Benefits Manager: processing
- eMPWR: payments

TIMS expected to migrate into these two systems:

- Workload Manager: Reports, claim token management and upstream functions
- eFolder: Document storage (similar to VBMS)

Other system migrations expected to occur:

- Institution Manager: WEAMS
- Enrollment Manager: VA-Once

Built for the Veteran and beneficiary:

- My Education Benefits: Apply for benefits, track applications, store letters, verify enrollment, and update personal information online securely and instantly.

HIGHLIGHTS & ANNOUNCEMENTS

Removal of off-ramps
- Change in IHL Training Type

- Recent manual award detected

- Change in Facility Code & Program (in some situations)

VET TEC
The next version of DGI introduces VET TEC to the CH33 system, allowing for the processing of VET TEC claims from eligibility through authorization.

VET TEC Veteran open work products will not stop manual processing or automation of a dependent claim.

Manual Letter Upload
The ability to upload letters is back for VET TEC! Restrictions apply.

AUTOMATION OF CH33

New Doc Types for DGI Automation

An upcoming version of DGI includes functionality to allow for the submission and automation of chapter 33 original claims, to include letter generation. New TIMS documents associated with this process are listed below:

1990A: Fully automated.

1990B: Partially automated, eligibility determined with bio data change(s).

1990G: Partially automated original chapter 33, but off ramped for manual adjudication.

These new doc types will be found in the electronic folder once claims have been fully or partially automated through the DGI system.
