Edition 4

Breaking News

DGIB Updates

The recent DGIB Team Line-up Edition of VACO Views introduced the DGIB Managed Service Team. As MEB (My Education Benefits) continues to automate ch33 originals for certain Veterans and Service Members, we look to the addition of EM (Enrollment Manager). EM will replace VAOnce, allowing School Certifying Officials to electronically submit enrollment certifications through the managed service. Additional improvements will be made iteratively and often.

Online Verification

This new method of online verification is being added for those who have authenticated their identity using ID.me and login.gov. Additional audiences will be added iteratively.

Carr vs. Wilkie for TOE

DGI will properly handle entitlement extensions for the TOE family.

Highlights & Announcements

Vacation Days

- DGI Enrollment Data pop-out screen has been updated
- Date range must be entered
- DGI will no longer accept the number of days alone
- Retroactive terms should not be affected

Letter Updates

- TOE
- AWD 1
- AWD 3
- VET TEC

TOE Family Entitlement Banner

You'll notice a new Transfer of Entitlement section of the DGI banner reflecting the TOE family entitlement transferred and used.

Claimant Service

Stores and shares beneficiary biographical information.

AUTOMATION NEWS

TOE Automation

An upcoming version of DGI includes functionality to allow for the submission and automation of chapter 33 TOE original claims, to include letter generation. For Upstream, automated TOE originals will follow the same BFLD process as automated chapter 33 originals

Here are the new doc types for TOE:

1990EA: Fully automated TOE original doc type.

1990EG: Partially automated, TOE eligibility determined, but off ramped for manual adjudication.

Until DGI fully automates TOE originals, only 1990EGs will be produced by the system.
